

BM-200 Mini Mixer/Mill® Compact Ball Mill

- Interchangeable sample vial holders for agate, steel, and tungsten carbide vials
- Four speeds over the 750 to 3500 rpm range for slow-speed mixing to high-speed milling for tough samples
- Safety interlock stops the motor if the lid is opened during the homogenization process
- Can be operated remotely with a portable battery pack (optional)
- Capability to grind samples to analytical fineness (<math><50 \mu\text{m}</math>)

Ideal for pulverizing the toughest rocks, mineral, cement, and ceramics; rapidly reducing samples to analytical fineness; blending powders; and making emulsions. Finely grinding the sample increases the surface area to improve acid dissolution for ICP, and pellet pressing or fusion bead for XRF.

Typical applications include: size reduction, nanomilling, powder blending, emulsion, and slurry grinding.
